

## 5. Certification Statement

I certify that this Remedial Action Report memorializes the completion of the remedial action and achievement of cleanup goals for the contaminants of concern at the IRP Site 11, Former MCAS El Toro, California. The remedial action at IRP Site 11 was implemented pursuant to CERCLA, and as documented in the ROD (DON 1999c) and the ESD (DON 2003). On the basis of the foregoing information and analysis, and as concurred by the regulatory agencies (see Appendix L), contaminated soil exceeding the cleanup goals has been removed from IRP Site 11 and the final response action for the site has been completed in accordance with the ROD and ESD. No additional response actions are needed to protect human health and the environment at Site 11 and the site can be released for unrestricted reuse. A 5-year review under CERCLA Section 121(c) is not required at Site 11 since hazardous substances, pollutants, or contaminants no longer remain at levels that would prohibit unlimited use or unrestricted exposure.
